

November 5th Release Notes

November 5th, 2014

The iSEEK team is happy to announce recent enhancements based on user feedback. We think you'll love how easy it now is to:

- **Create** Mash-ups of your data
- **Enhance** your results views with embedded charts
- **Resize** your data columns for readability
- **Customize** your own chart themes.

Embed Charts Into Results Views

Users may now enhance they numeric fields in a results view by selecting the 'Graph it" icon.

Once the icon is selected, the user may select colors for positive and negative values.

Once the user clicks save, we can see the bar appear under the column header. Ranges are determined by the share of the total amount.

3

Resize Column Width

Users may now resize the width of the columns in all tables. Here we can see the column is too large and we can not see all of our data:

Opportunity ID	Expected Close Date	Forecast Stage	Amount
2593276	10-31-2014	Closed Won	\$6,645.00
2569144	09-04-2014	Closed Won	\$1,495.00

4

Customize Chart Themes

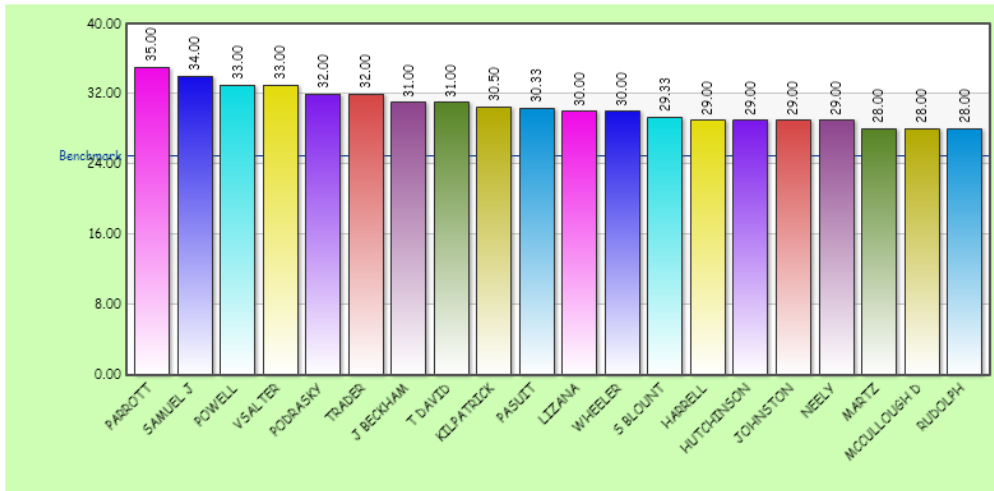

Users are now able to change and customize their chart themes. There is preset list to choose from as well as the option to add a custom theme:

If the "Add Custom" option is selected, the user may now change the order or specific colors, the color and style of the font used, as well as the color of the chart background

The user can save an unlimited number of custom themes and preview the changes before saving

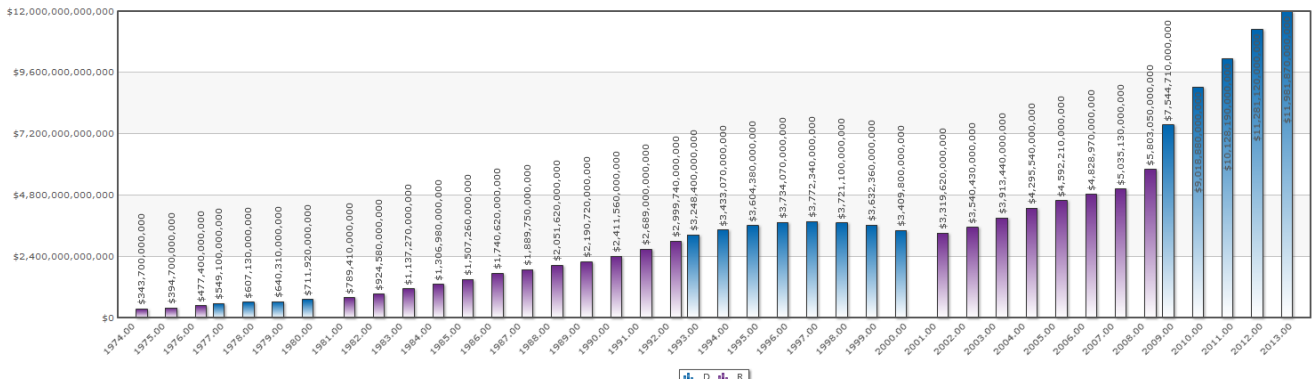

5

Label Intervals On The X-Axis

Users can now change number of labels displayed on the x-axis. Here is an example of the total debt held by the american public since the early 1900's.

Total Debt Held by The American Public

As we can see there are many labels on the x-axis that make it difficult to read. What if I just wanted to see the year in intervals of 5? Simply select the "Label Interval" option when creating a chart and select your desired number of intervals.
