

Studio

Studio modules give the administrator the ability to determine which menus and modules appear on the site, create custom fields, modify the layout of the fields of a module, edit pick-list values, and set up mandatory fields.

STUDIO

Layout Editor

Designing and Modifying the layout in each of the modules

Menu and Module Organizer

Organize menu and module access and visibility

Custom Fields

Manage different types of user-defined fields

Picklist Editor

Customize Picklist values in each module

Mandatory Fields

Manage mandatory fields of all modules
