

This report allows users to view a list of assignments and names of the examinees that have **not started** assigned tests. Users can view the test status of a specific examinee using the **Examinee Name** filter. The buttons on the top right of the page allows flexible options to save the needed report:

Copy: copies the information to the clipboard so that it can be pasted elsewhere, for example, a Word document

CSV, Excel, PDF: Saves the report in the specified format

Print: takes a printout of the report

Column Visibility: allows you to choose the columns that you would like to be shown on the report. Restore visibility will reset the default columns shown on the report.

Report Configuration Option(s)

A few of the reporting options can be customized under the **Assignment Configuration** section. For example, the reporter, proctor or administrator may want to view a detailed individual report with score information. When the admin unchecks the "Display Score in Dashboard" option, the examinee views a custom message upon assessment completion and not the actual score information.
