

Add new Google Contact contacts as AMPED leads

Zapier allows you to automatically send new Google Contacts into AMPED as leads. Use the template to get started!

Getting Started:

To use this template, you will need the following:

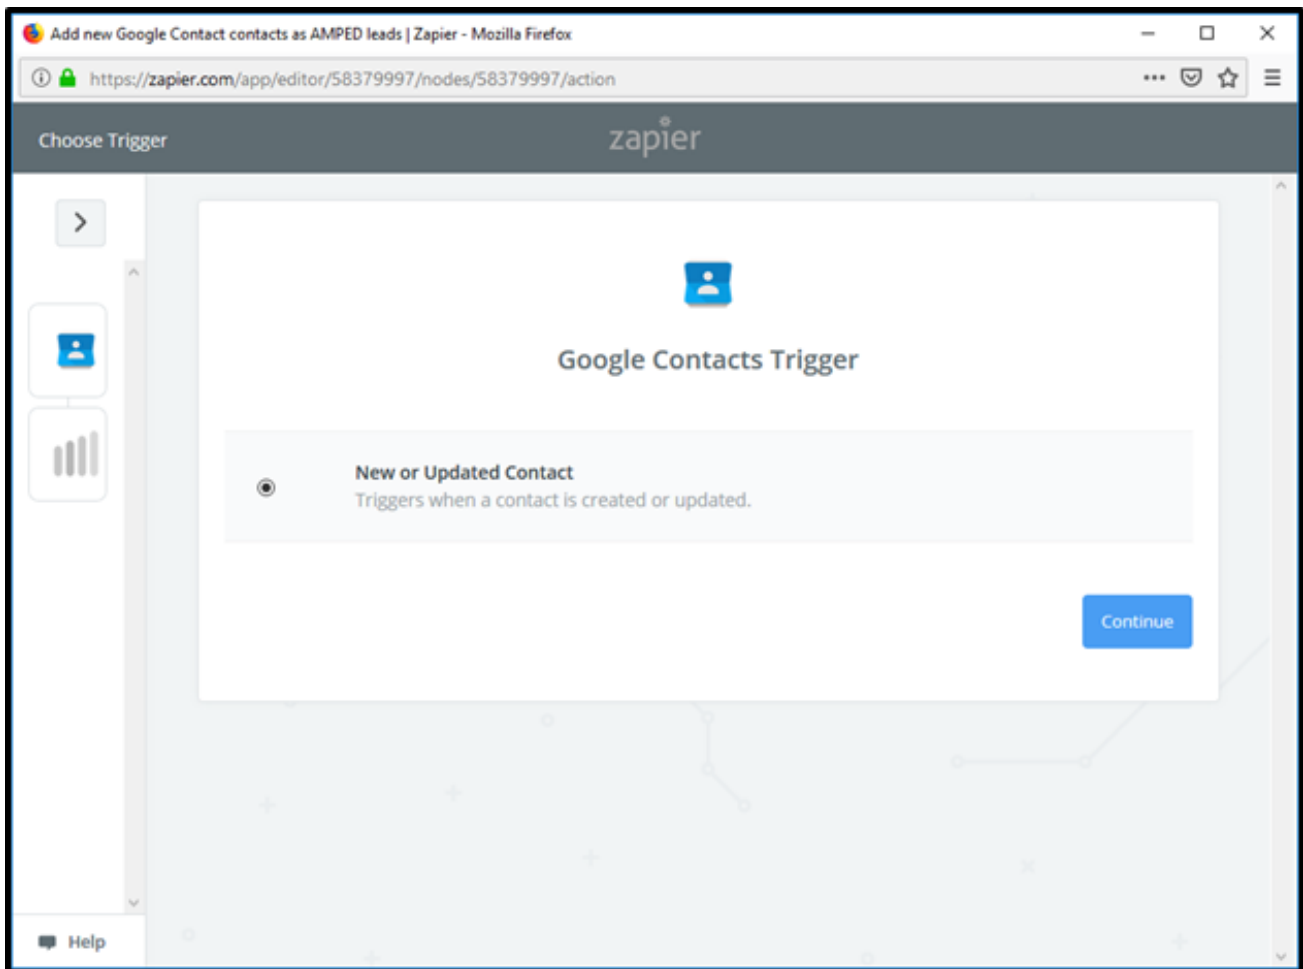

- Zapier Account
- Google Contacts
- AMPED Account

How to Setup the Template:

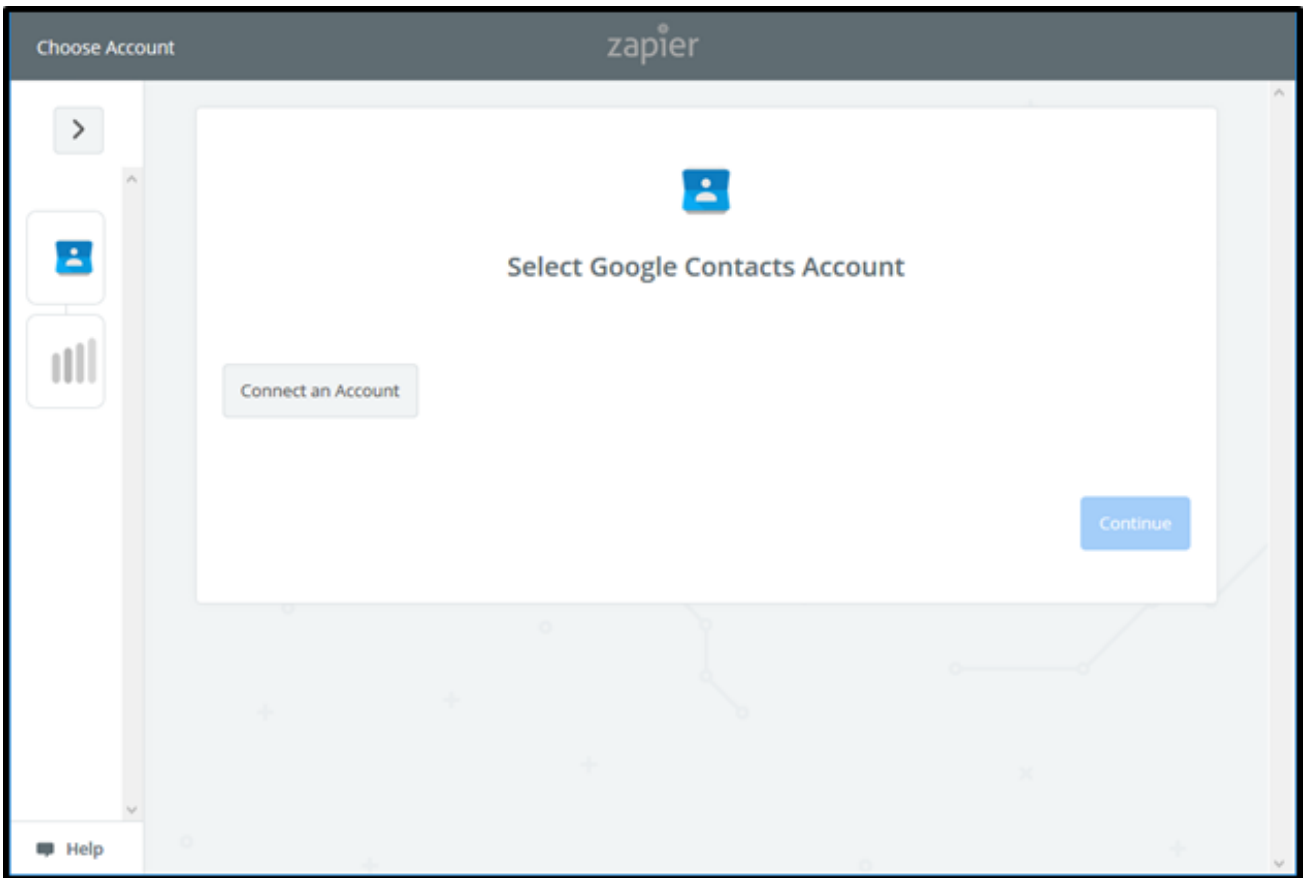

Click the “Use this Zap” button next to the template Name “Add new Google Contact contacts as AMPED leads” to begin configuration of the template.

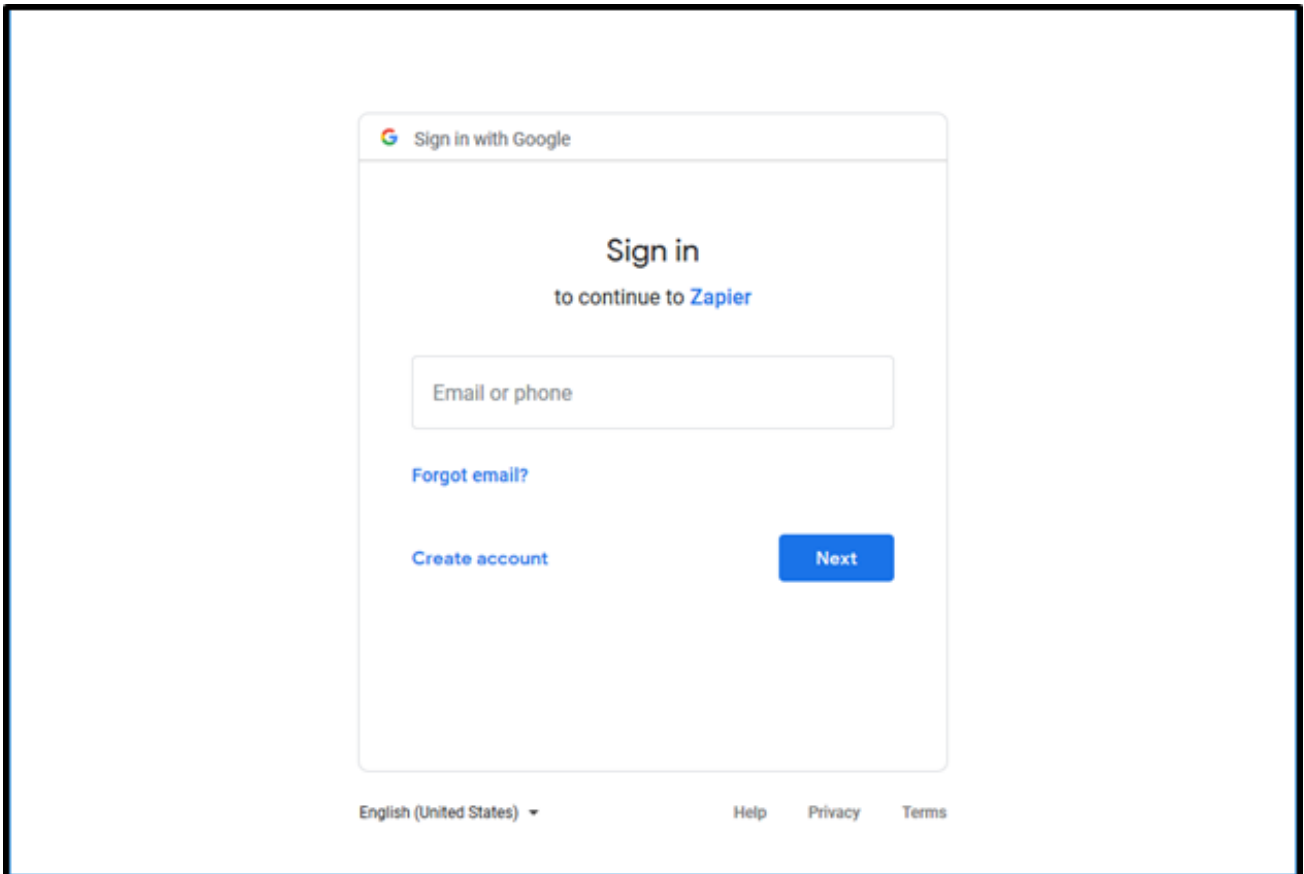

The Google Contacts Trigger “New or Updated Contact” will be automatically selected. Click “Continue” to move onto the next step.

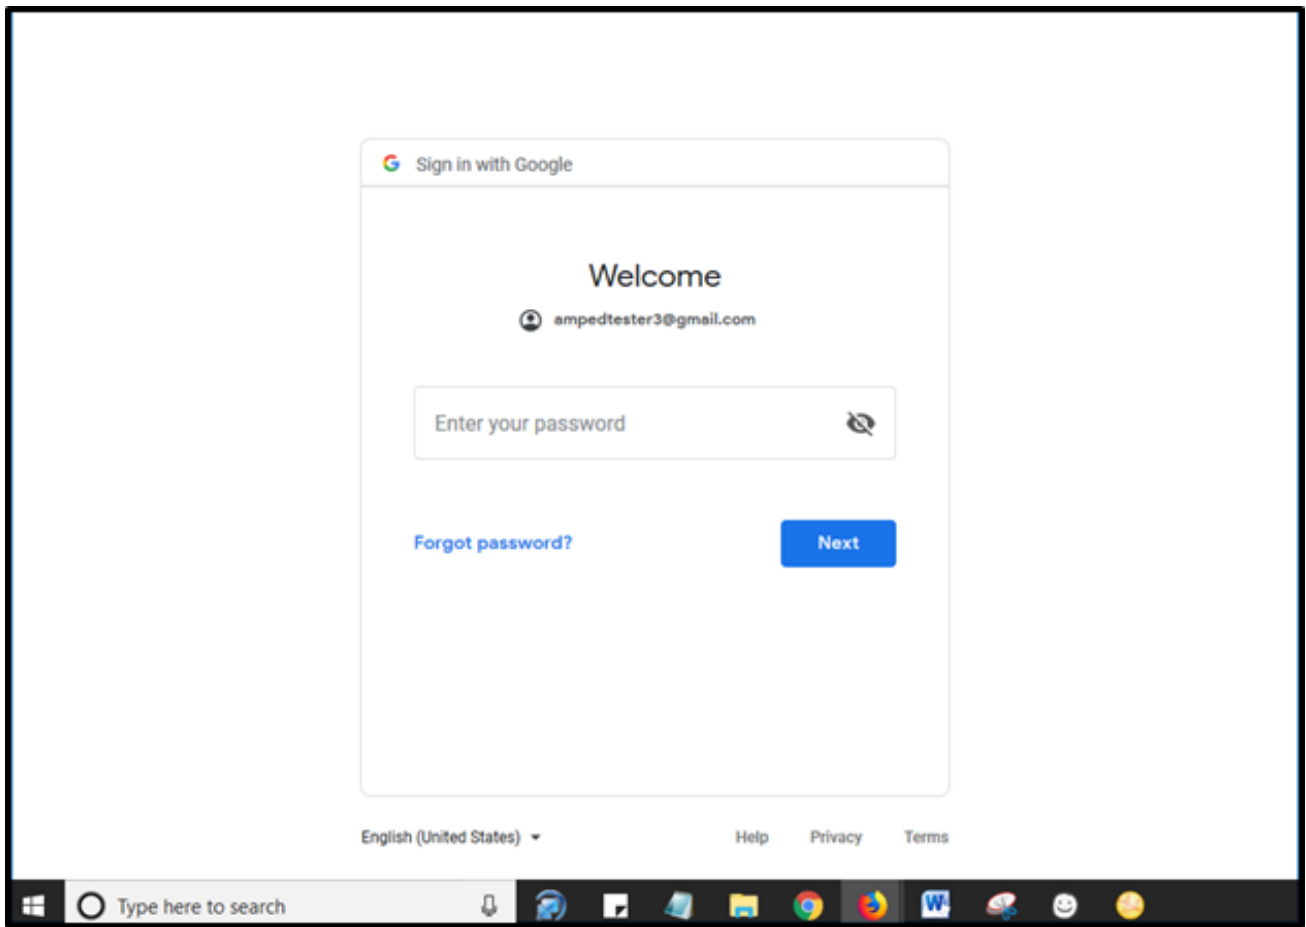

Once the trigger has been selected, you must connect your Google account. Clicking “Connect an Account” will populate a new window where you will enter your Google account information. If the window does not appear, check your browser pop-up settings.

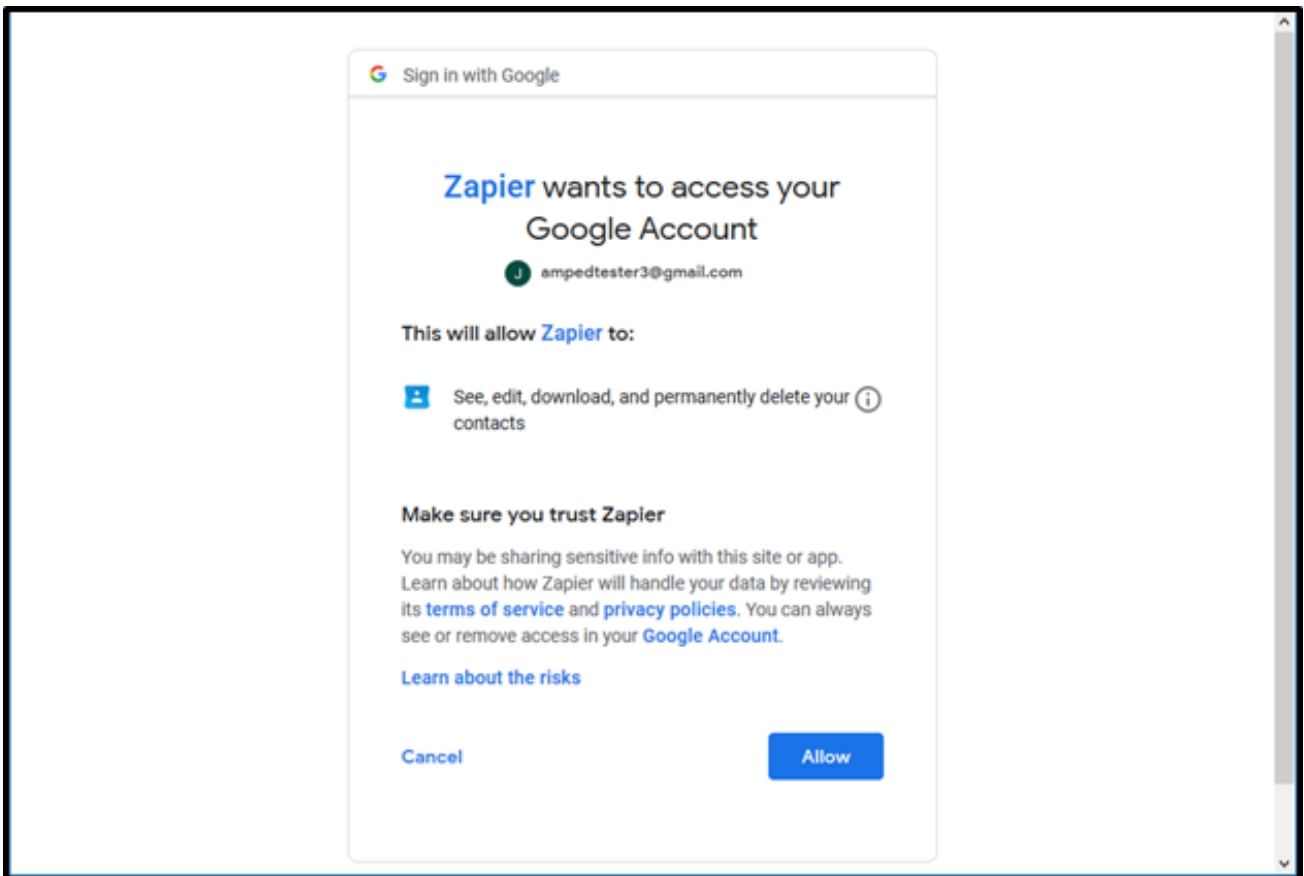

Enter your Google email or phone number and click "Next" to enter your password.

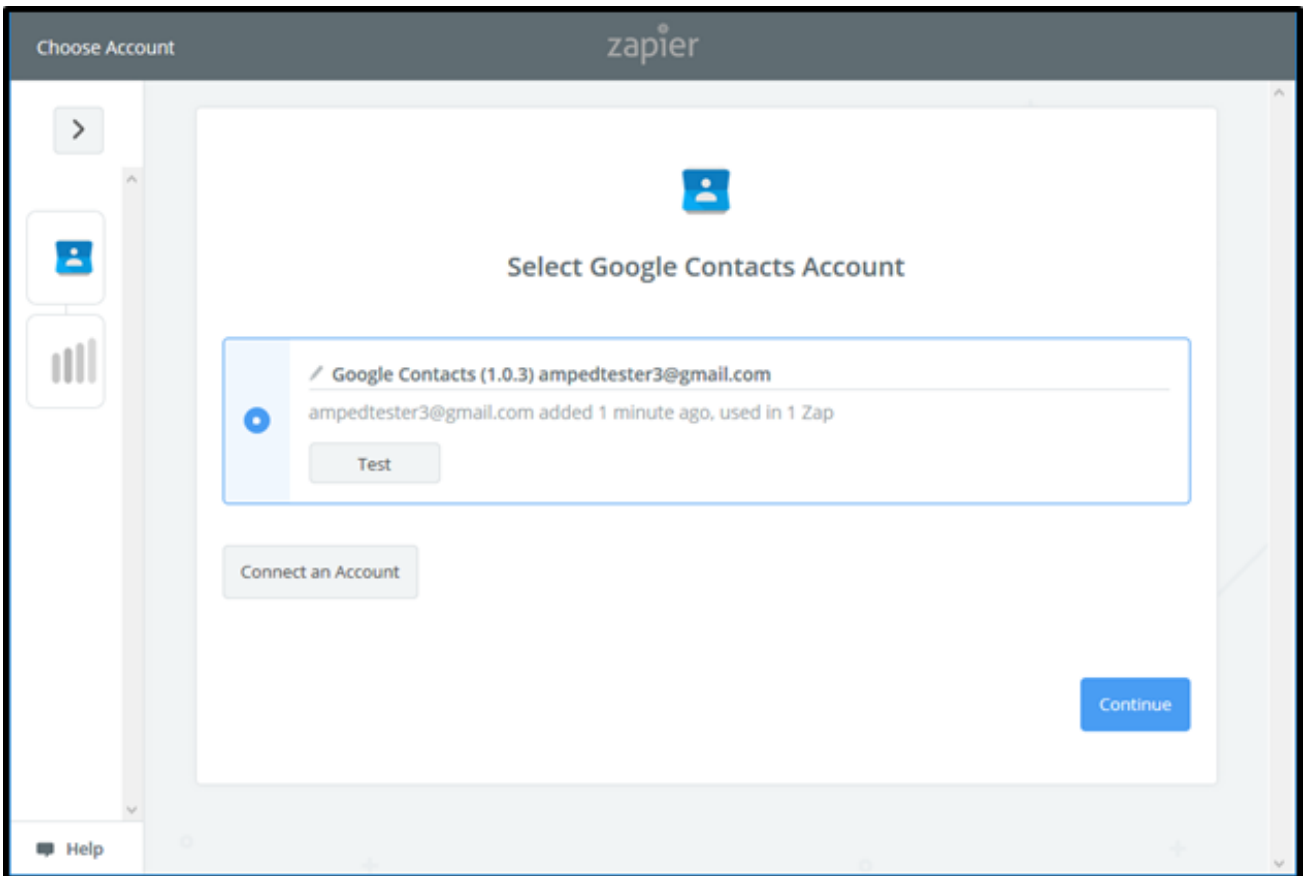

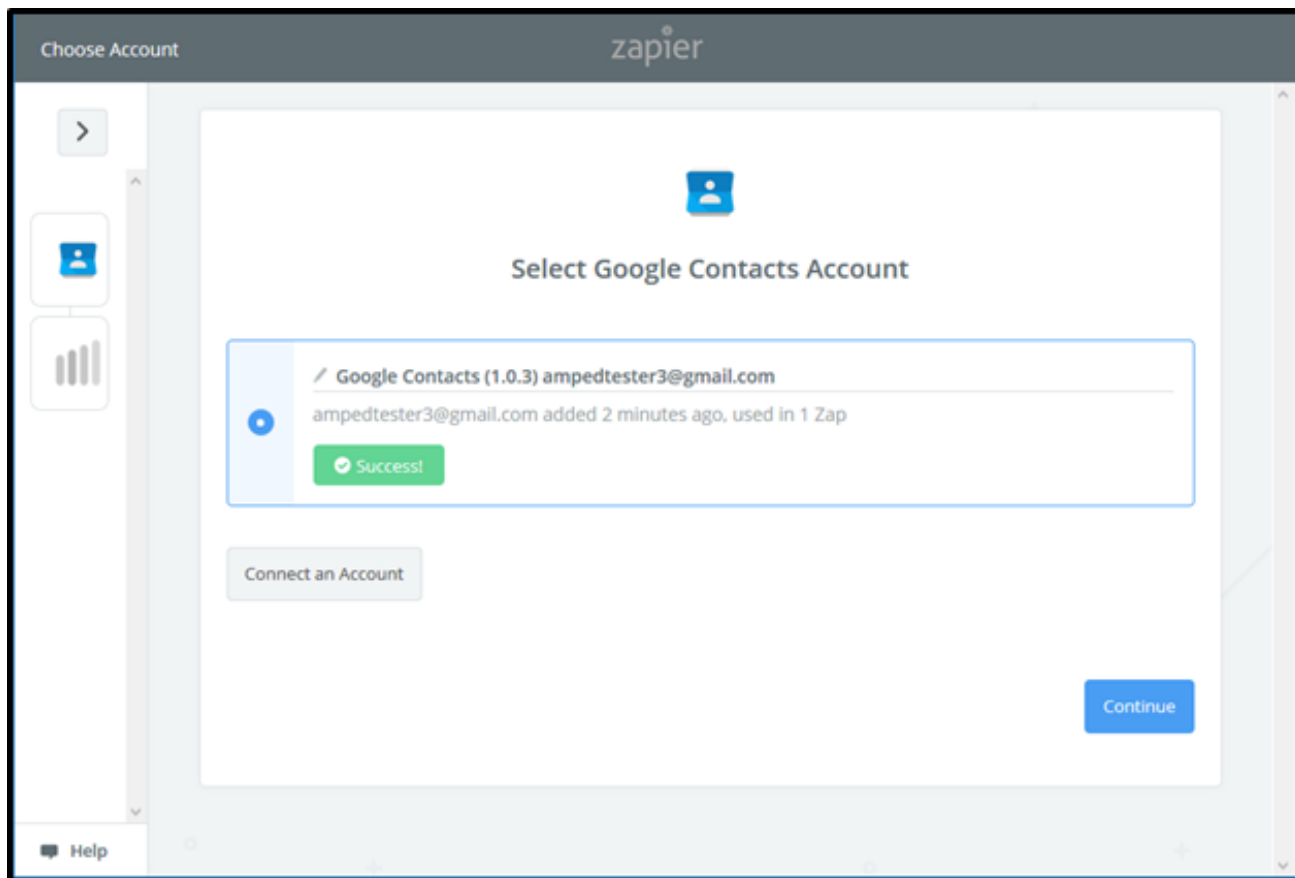

Once your Google account information has been entered, click "Allow" to let Zapier access your Google Account.

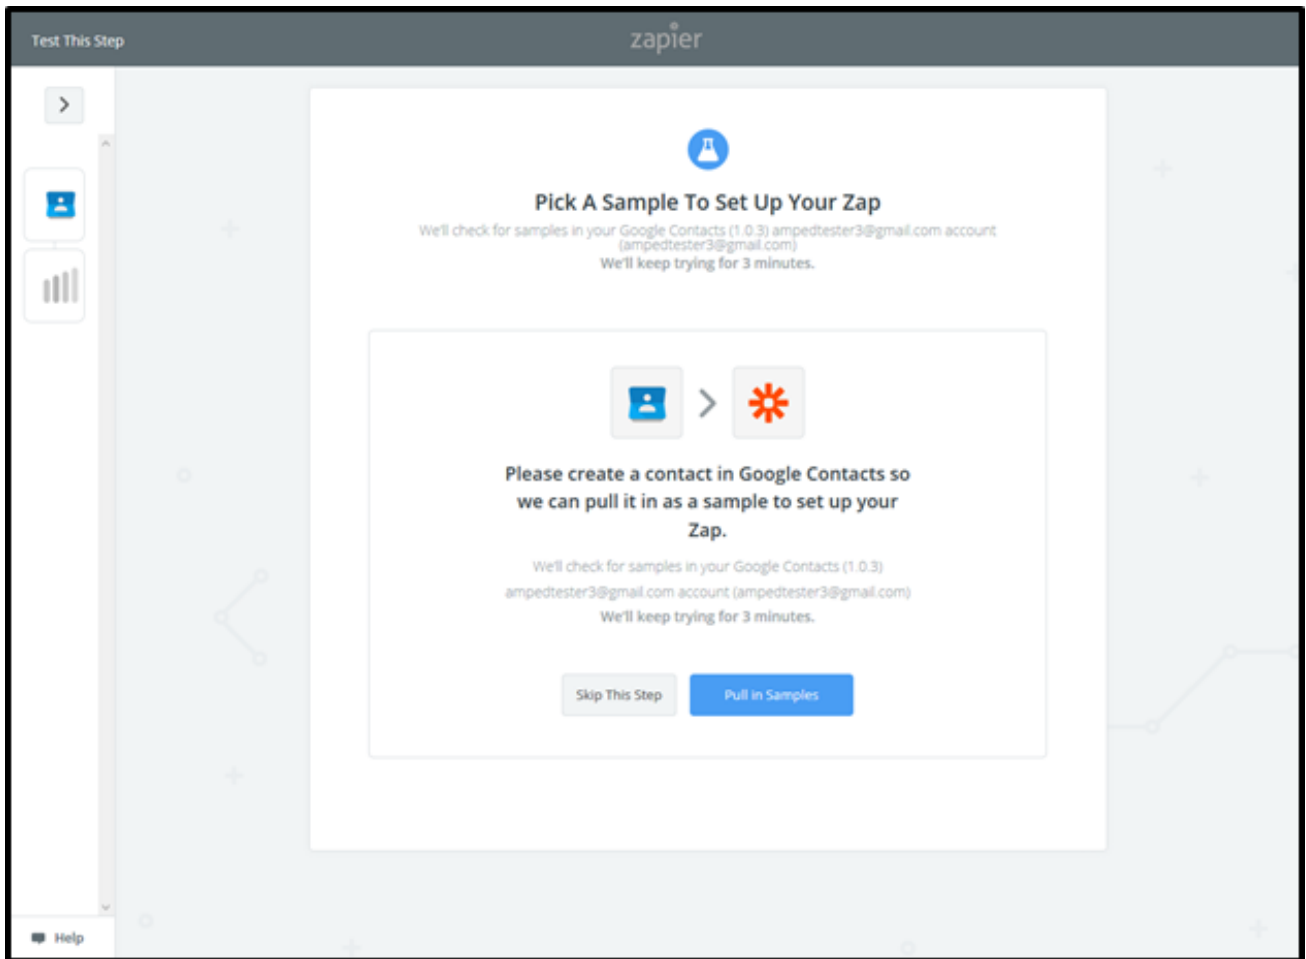

To make sure your account is connecting, you can click "Test". This will send a quick test to ensure the connection.

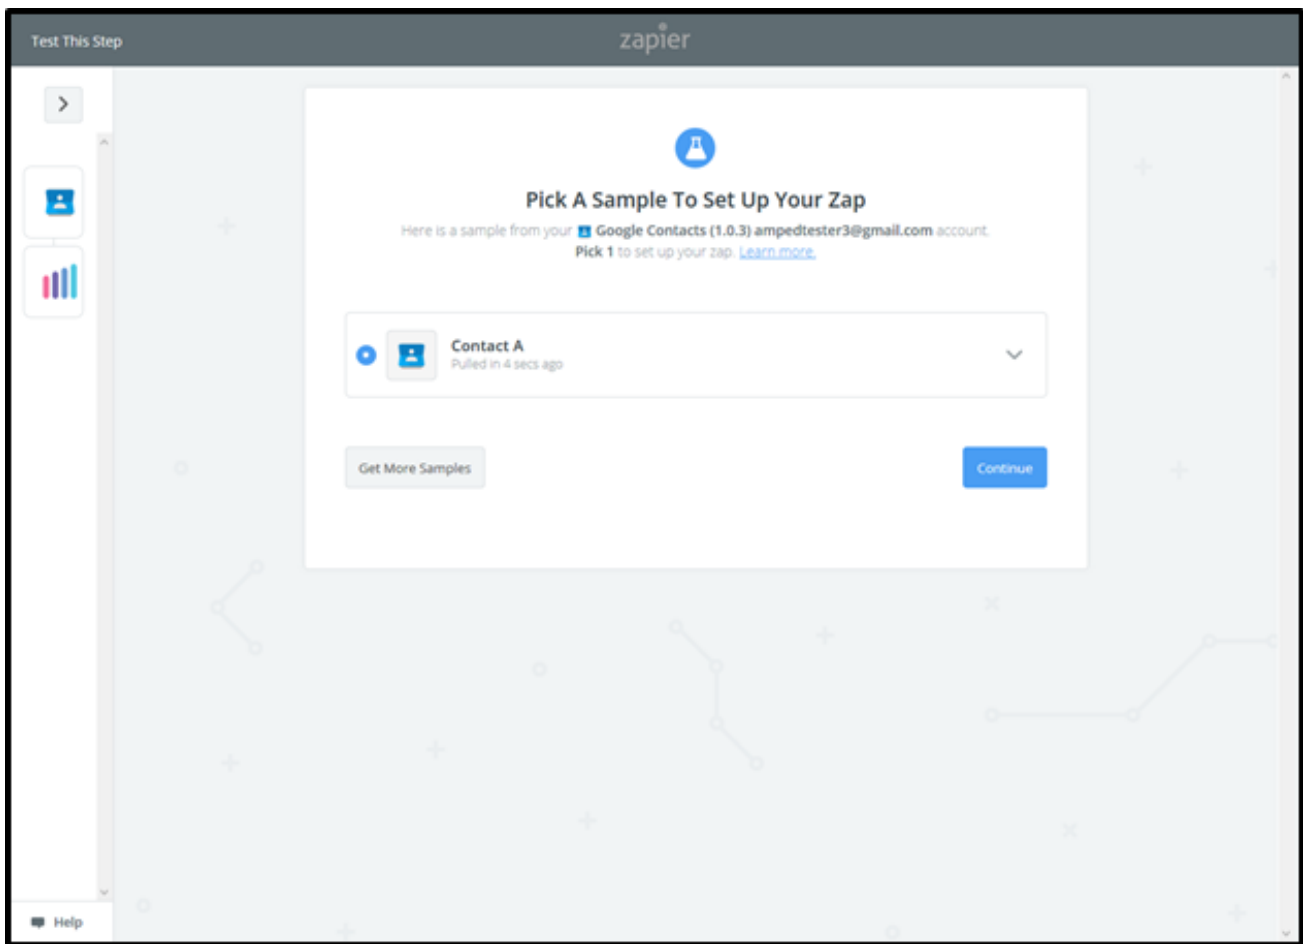

If successful, you will see a green "Success!" notification. Click "Continue" to move forward.

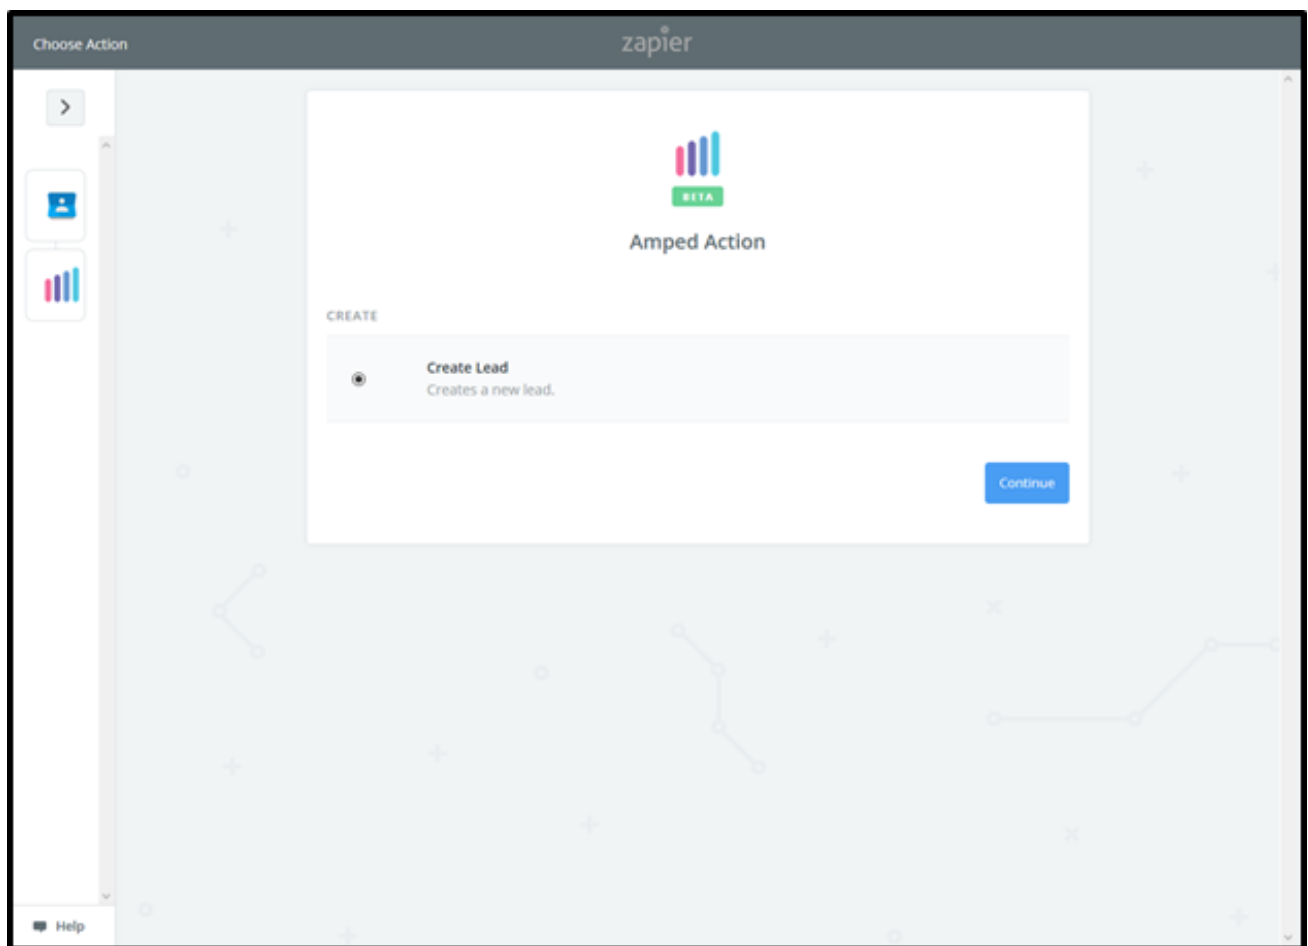

You will now be asked to pull in a test contact from Google Contacts to setup the Zap. Click "Pull in Samples" to look for your Google contacts. You can also "Skip This Test" if you choose not to look for any samples.

A sample will be selected for you or you can choose another sample. This sample will help you map over the fields from Google Contacts to AMPED. Click "Continue" to move onto the next step.

Now it is time to integrate with AMPED by selecting the AMPED Action. "Create Lead" will automatically be selected for this template. Click "Continue" to map your AMPED account.

To connect your AMPED account, add your AMPED username and password and click “Yes, Continue”.

Allow Zapier to access your Amped Account?

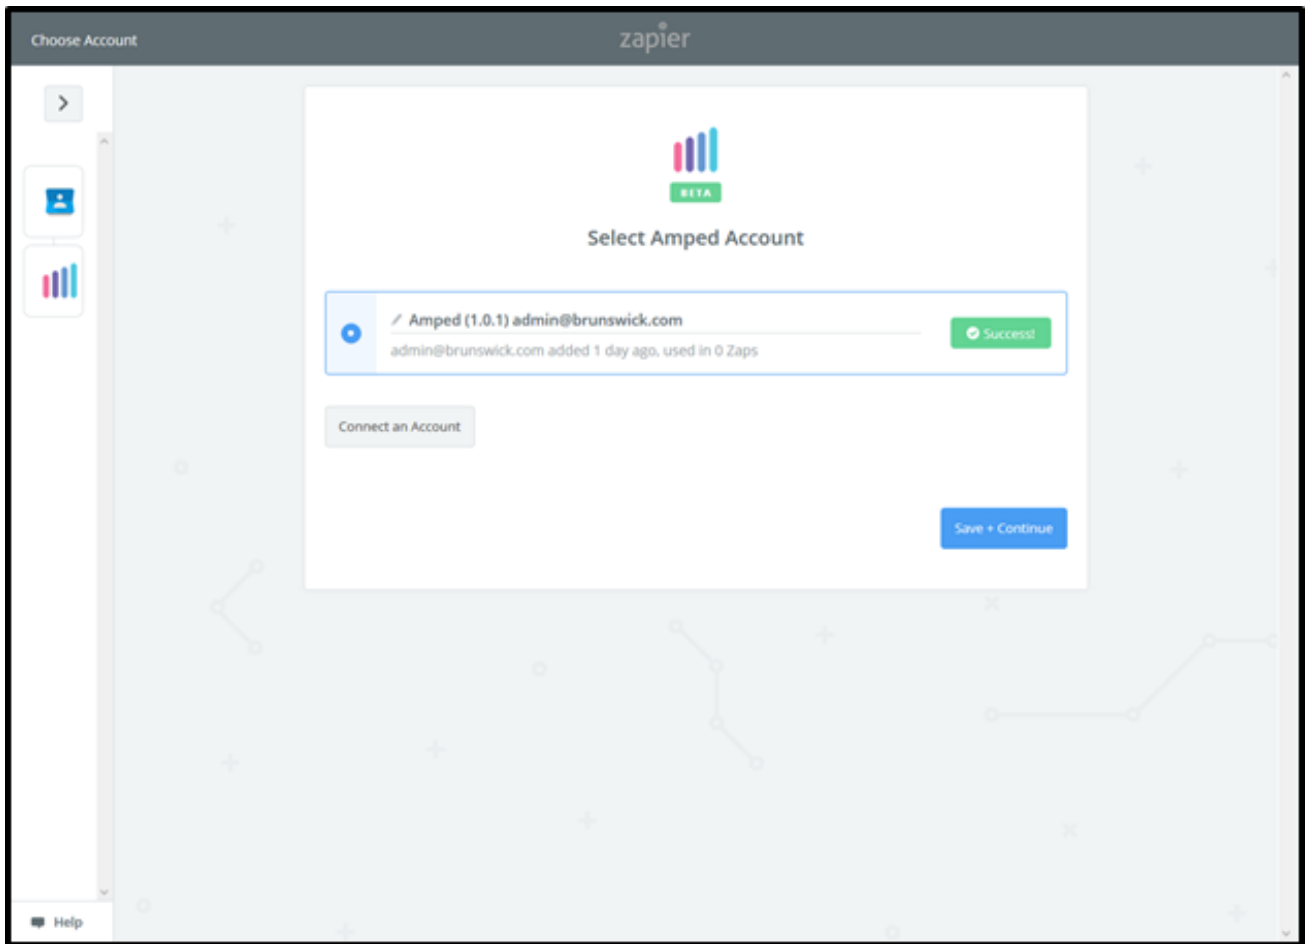

Username (required)

Password (required)

Yes, Continue

Cancel

Once your account has been connected, you will see a green "Success!" notification. Click "Save + Continue" to move onto the next step.

Now you must select which fields to map from your Google Spreadsheet to AMPED. Click on "Show advanced options" to see all available fields to select.
