

Supercruncher Update 8.25.2011 - Watching Reports

Supercruncher Update 8.25.2011 Goals:

The goal of the release was to improve collaboration of reports through **watching**.

So what is new?

- **Watching a Report** – You can now **watch** a report by turning on watching by clicking on the Sprocket on the report. **Watching** allows you to receive by email and activity stream notification when the report has changed or comments have been added. You can also **unwatch** by clicking on a link in the email or from the sprocket in the report. If you created a report you are automatically watching the report.
- **Performance Improvement**-- when a report index has been updated the first viewing of the report is much faster.

Example Performance Improvement:

Before improvement:

1st report visit: 8.029 s

2nd visit: 0.443 s

After improvement:

1st visit: 0.702 s

2nd visit: 0.447 s

Walk-throughs:

- Watching a Report
