

Supercruncher Release 9.19.2011 - Reports Usability Release

Supercruncher Update 9.19.2011 Goals:

This release focuses on improving the ability for users to easily create tables and charts so they can be easily published, communicated, and collaborated on. In the same way we improved the usability of the core navigation of the product, we have dedicated this release specifically on report features of Supercruncher.

So what is new in this release?

- **Reports can have many charts and tables.** Previously only one table per report was allowed.
- Tables, charts, and formulas are rolled into **one improved and common UI to quickly build tables and charts.**
- **Tables and charts are more easily added to dashboards.** Designed to be quick and easy.
- **More Chart Types:** More chart types are supported. Additional include: Headline/Single Value and funnels.
- **Watching:** You can watch a dashboard and receive your emails in a digest form.
- Various operational and smaller **feedback changes contributed from folks.**
- Also all the new functionality we recently added recently: **copy dashboards, commenting, watching reports, performance improvement on report visits.**

Walk-throughs:

- Creating a Table
- Creating a Chart
- Adding Tables and Charts to the Dashboard
- Adding a Metric
