

Supercruncher Release 10.06.2011 - Advanced Metric and Table and Chart Validation

Enhancements to tables and charts to improve usability by validating user selections and providing proactive feedback on what can and can not be done. Table and Chart integration into other parts of the application such as find/search. Provide additional advanced metric options such as ratio, difference, and share in %. Implement some feedback and bug fixes.

- **Finding Tables and charts** - search for tables and charts to quickly go to a chart or table.
- **Limit Number of datapoints/rows to include in the Table or Chart** - create a chart with the top 10 sorted by highest or lowest to focus your chart or table to include only a limited number of data points.
- **Validation of Incompatible chart or table selections** - As a user, I would like to be guided into making compatible selections in a chart or table because I don't want to end up with a blank table or confused by why my selections don't render.
- **Advanced Metrics- Ratio and Percentage** - support for two advanced metrics: calculate the percentage of ratio, percentage difference and percentage share(exists).
- **Edit and Delete Metrics** -you can edit and delete metrics
- **Digest Email** - minor improvements to roll-up the events in the email
- **Headline Chart Resizing** - As a user, I would like to change the size of the font in the headline because I want to make the text larger or smaller for my dashboard context.
- **Bug fixes reported post release of 9.19.11**
