

# Supercruncher Release 12.09.2011 - Maps, Animated Headlines, and Group by +

## Release Goal:

- Implement Feedback from the usability study on setup speed of report fields and tabs, creating charts.
- Reduce the number of reports required to create tables and charts
- Empower users to easily communicate their data in new ways

## New Features and Changes:

- **Group by Many:** you can now create tables grouping with more than two fields or metrics.
- **Reduce the Number of Reports Needed:** you can apply filters to headlines and different charts to limit the scope without creating a new report.
- **Animated Headlines:** navigate the headline through multiple datapoints rather than just the overview. You can also the animation speed and watch the data hands free.
- **New Chart Type:** You can now create United States country with your data on them.
- **Trending Improvements:** you can now control include and exclude dates in a trend line.
- **Usability Improvements:** the field selection managing tab fields and results fields is simpler.
- **Bug Fixes:** fixes issue with activity stream events, group by month issue, keyword search not applying to tables and charts, +15 others.
