Supercruncher Release 02.15.2012 - Column Pivoting, Cloud Data Integration, Color Control, Comparison Custom Metrics

Release Goals:

Improvements and additions to:

- **"Supercrunch Cloud Data"**- support for third party cloud hosted data
- **"Better tables"…** for grouped data
- **"Comparing Metrics"**…in custom metrics
- **"Do the time"…** more time support for week and quarters
- Empower users to easily **"communicate data"** in new ways

User Stories:

- **Table view for charts** - on the dashboard you can now view the data in a table view for data in the chart
- **Color Scheme Selection** - you now have the ability to change the color scheme on my charts to control the color and data context
- **Pivot Table- Column Pivoting** - Improvements to the pivot table for grouping by columns
- **Custom Metric to compare data**- Including fields from other reports - custom metrics can include data fields from another report so you can create metrics that compare data with different filter selections.
- **Time - Quarter and Week -** you can now create a table or chart based on week or quarter
- **Cloud Data** - you can now incorporate more sources of data into your reports so you can supercrunch contact forms, surveys, and other web forms. Integration with formstack and remote hosted CSV
- **Bug Fixes:** several bug fixes based on feedback

Documentation Updates:

- **Custom Metric Documentation for Report Comparison Additions:** https://resource.vantage.com/display/iseeksc/Guide+to+Custom+Metric+Expressions
- **Adding a Dataset from Formstack**https://resource.vantage.com/display/iseeksc/FormStack
- **Installing and Using the Data Agent**https://resource.vantage.com/display/iseeksc/iSeek+Data+Agent
