Supercruncher Release 5.31.2012 - Mapping Layers, Share Up, Webpage Embedding

Release Goals:

- Fast and Easy access to add new Data- Improve scheduling of web files
- New Ways to visualize your data- Improved Geographic mapping support
- Simplify and improve the use - Usability improvements with dashboards

New Features:

- **Geographic Data Mapping** - you can graph your on a map with multiple layers of data. This allows you to view multiple types of data on a geographic perspective. Mapping works with phone numbers, ipaddresses, and longitude and latitude coordinate field data.
- **Dashboard UI Improvements based on Feedback -** Adding content to the dashboard does not refresh the dashboard page.
- **Embed Dashboard Table or Chart in a Webpage** - you can now embed a table or chart into an external webpage with a simple snippet of code.
- **Scheduled Web Hosted CSV file**- you can now simply schedule the fetching and updating of a CSV file that is hosted on a web
- **"Share Up" -** you can now share to groups above you in the user hierarchy.
- **Expiration of Guest Account**- graceful expiration of user accounts through email notification and collection of feedback
- **Several Bug Fixes**
