Supercruncher Release 01.17.2012 - Maps, Pivots, and Custom Metrics

Release Goal:

- New and Easier ways to visually display and communicate data through maps.
- Improve the display and navigation of grouped data and their aggregates.
- Improve Navigation to support faster access to recently access reports.
- Added support for custom metrics for advanced calculations.
- Improvements to Data Transfer Agent to make configuration more centralized

New Features and Changes:

- **Security:** Several Failed attempts on login are locked out to keep data secure.
- **Custom Metrics:** create a custom metric that will allow me to total, add, subtract, divide, or multiply multiple fields or values with custom math and formulas.
- **US Map Type Charts:** create a US(states), US(States), US(Single State County), US(Regions) map chart using a field zipcode or phone number in your data.
- **Grouping/Pivot Table:** Grouping and Aggregates - As a user, I would like to view grouped table data as a pivot table with the groups drillable and the aggregates summarized for each group because I want to see the the rollup and roll down of table data and the aggregates.
- **Last 5 reports Viewed** -you can see the last 5 reports viewed in the Reports navigation drop down to quickly jump from one report to another.
- **Bug Fixes:** fixes issue with activity stream events, group by month issue, keyword search not applying to tables and charts, +15 others.
