Supercruncher Release 4.17.2012 - Performance Turbo Boost

Release Goals:

- Improve the Speed of the loading of tables, charts, reports, and dashboard
- Empower users to easily "communicate data" in new ways - custom colors with gauges, dashboard lines
- Improve dashboard usability- vertical and horizontal lines

New Features:

- **Performance Turbo Boost**- Significant improvements to the speed of tables, charts, reports, and dashboard. Intelligently improves the speed by learning how you use Supercruncher.
- **Horizontal and Vertical Lines** - You can create horizontal and vertical lines on your dashboard to create visual borders and organization.
- **Custom Colors** - You can not set custom colors and ranges for the display of data in gauge type charts.
- **Hide the Dashboard widgets titles**- you can hide the widget titles so the widget floats and uses less space on the dashboard
- **Several Bug Fixes**
