Supercruncher Release 9.20.2012 - Agents, Dashboard and Report Setup Improvements

Release Goal:

- **Empower users to easily "communicate data" in new ways** - Intelligent Agents via Email and Dashboard improvements
- **Feedback on Existing Functionality** - improvements to reports and dashboards

New Features

- **Epic: Intelligent Agents:** Intelligent Alert Agents can be created to email based on the change in data
  - Add/Edit an Agent with Email based notification
  - New Product Menu for agents and functionality to list, view, execute, and delete Agents
- **Tabs can have color**- Report tabs can be be changed from the default color to a picker of choices to provide additional contextual meaning to the report tabs.

Feedback

- **Report Activity Jump to Another Report-** allow easier access to switch reports that you are viewing the the activity for
- **Add additional ordering/positioning options to the gadget menu**- support to "bump" up, down, left, and right a dashboard widget to make reorganizing a dashboard easier.
- **Decrease time it takes to add fields to tabs(with many tabs or fields)** - improve the search result field format and tab organization interface to be faster and easier for reports with many fields.

Maintenance:

- **Bugs: several bugs including metric-less tables on dashboards,**
