

Supercruncher Release 11.12.2012 - Dynamic Agents and Data Predictions

Release Goals:

- **Empower users to easily "communicate data" in new ways** - "Smarter Agents"- add more intelligence to agents such as more customized notifications and finding patterns in data.

New Features:

- **Dynamic Agent Notifications** - Dynamic messages can be added to the agent notifications. This allows agents to be more customized and include more data in the message. Agents sound smarter and require less work to get access to the data you need.
- **Smarter Agents**- a new report admin section has been added to apply dynamically generated fields based on machine learning and pattern matching.
- **Bug Fixes**: bugs related to condensed view and keyword filters, Fix date formatting of date time fields, and provide time formatting options. Several others.
