Faculty Resources/Videos

Instructor/Tutor Getting Started Video *Learn how you and your students can use IntelliWriter for every writing assignment required in your course! See how students are improving their writing and faculty are saving time.*

Syllabus Description

Our class will be using IntelliWriter this semester to improve student written work. Students can compose directly in IntelliWriter or import a document for review that they've written elsewhere. There are functions for text editing (grammar, spelling, mechanics, etc), discipline-specific writer's models, and citations. The program can also help expand your vocabulary and search the web for keywords. Composition software, like IntelliWriter, works best when paired with careful review from peers and writing center tutors. IntelliWriter is already installed on your (Canvas, D2L, Blackboard) course page listed in the course menu.

Recorded Webinars:

- Florida International University: *Interview with Vicenta Shepard, Director of the Center for Academic Success on their experience using IntelliWriter at the center and across disciplines.*
- Arkansas State University: Webinar: *Presentation to the Missouri Community College Consortium regarding ASTATE's experience using IntelliWriter (formerly CorrectEnglish) in the School of Business*
- From Educators to Artificial Intelligence: Three Perspectives on Writing Support - *Presented at the 2022 Educause Conference in collaboration with the University of Rochester, Arkansas State University, and Florida International University*
- IntelliWriter vs. ChatGPT - Webinar presented for the University of Michigan - Dearborn (COMING SOON)
