

# iSEEKsc Release 9.12.13 - Simplify and Improve User Experience

## Release Goals:

- **Simplify and improve user experience** - Simplifying manual data loading process and improving charts and chart types.

## New Features:

- **Create Express Dataset:** A user may now create a new dataset in as little as one step. Drag and drop your file onto the screen, format on the fly, and show a quick preview of your report. Once the user is satisfied with their dataset, they can save it to begin processing.
- **Improve Chart Colors:** The chart colors have been improved to be brighter, crisper, and more vibrant. .
- **New Polyhedral Chart Type:** A polyhedral chart is an interactive 3D visualization that depicts one or more metric calculations for a single field value, taking on a polyhedral shape.
